

SHERMAN-TANK
Rotational Molding

Sherman Tank & Micro Matic

A controlled, managed approach to chemical packaging and transfer

THE MICROMATIC CLOSED ENVIRONMENT ADAPTER KIT

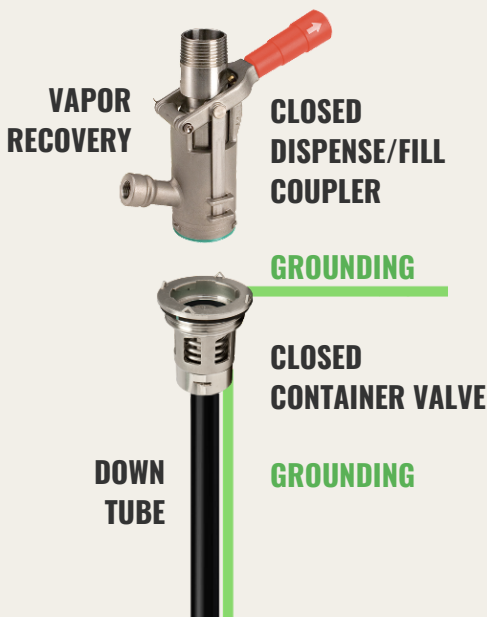

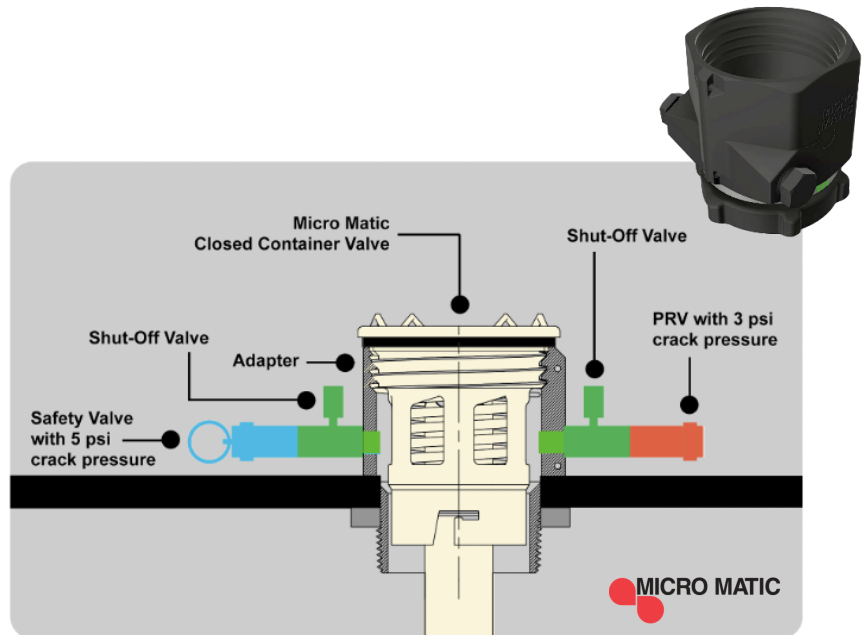

Offers closed container valve PRV's making it easy to close the environment.

Includes:

- Micromatic Adapter With 2"NPT To Allow For 2" Buttress MicroMatic Valve Install
- Closed Container Valve 2" Buttress
- Shut Off Valve & 5 PSI Safety Valve
- Shut-Off Valve & 3 PSI PRV Breather

Install Options:

- Through Lid
- On 1 of 3 2" NPT Ports on tanks with Versa Kit installed

MICRO MATIC CLOSED SYSTEMS

Provides a controlled and managed approach to chemical packaging and transfer.

Maximize Delivery Efficiencies

- Offload chemical delivery to onsite tanks with higher fill rates

Maximize Product Integrity & Yield

- Closed System Design maximize product purity
- Reduces chemical loss when filling due to chemical evaporation and spillage

Closed Loop Dry Break Design Reduces Risk & Liability

- Minimizes worker and environmental exposure from liquid and vapors
- Mitigates emissions by capturing vapors versus omitting to atmosphere
- Mitigates static build-up with integrated static dissipative and grounding capabilities
